INSTRUCTIONS

Collection of urine 24 hours:

1. When awoken in the morning (6-7 a.m.) empty the bladder by urinating in the toilet.
2. Than, collect all urine of that day until 6-7 a.m. of the next day, in the special container the laboratory gave to you.
3. Shortly, the first day you do not collect, after that you collect all urine, including the first one of the next day.
4. The day you collect the urine, you take the same amount of water or liquid you take normally.

IMPORTANT NOTE:

You should avoid spilling the urine as this can vary the results of your test.
